## ABOUT ME

Front-end oriented Full Stack Developer with a background in law which helped me gain experience in finding solutions to complex problems. Knowledgeable in agile methodologies, GIT, data structure, algorithms, JavaScript, React, Redux, TailwindCSS, Node, Express, PostgreSQL and MongoDB. Full Stack development experience in a SPA and a Web App with the above mentioned technologies. With agile mindset, result oriented, creative thinking, tendency to teamwork and a lot of curiosity for learning. English level: C2 (Proficient).

## PROJECTS

**Full Stack Web Developer – HUMAN CONET**                              Jul. 2023 - Aug. 2023
Academic experience. Henry Bootcamp

Develop an application for a French-Colombian non-profit organization.
- The web app shows the projects, articles and documentaries carried out by the organization.
- It allows the login and authentication of the page itself and also using Firebase, with an admin panel and another one for the user.
- In addition, you can comment, rate posts, create articles, documentaries and projects.
- It has payment gateway to make donations using Mercado Pago and notifications with Nodemailer.

Function within the project:
- Create own and third party registration and login form using Firebase and React.
- Apply layout patterns using TailwindCSS.
- Create storage in the global state with Redux and Local Storage.
- Create routes to interact with the Rest API with validations, hashing and JSON Web Token to comply with security standards.

**Front**: React, Redux, TailwindCSS.
**Back:** Node, Express.
**Database**: MongoDB, Mongoose.
